OPHELIA FINKE | DISCRIT 89 PLUS

“...Ophelia Finke’s work includes all medias, however there is a focus on 3 dimensional works, using a wide range of materials. Ophelia’s work is about adventure, discovery, exploration and research. On the one side she is interested in finding simple coherences that occur in life and on the other side she continuously constructs things/ objects, curious about the outcome. Ophelia enjoys working and experimenting with high-tech and contemporary material while using at the same time the traditional processes of making of art. In her recent work/ sculptures she tries to filtrate the contemporary massive input of knowledge and imagery, to find something essential, a new renaissance to the eye of the hyper-satisfied society by creating simple, clear images, that are often not reproducible pieces of work and more complex at second glance...”
